CSS	*Experienced*	NodeJS	*Skillful*
Html	*Expert*		

EXTRA-CURRICULAR ACTIVITIES

❖ **SSIP hackathon Finalist**   Nov 2023 — Dec 2023
                                                                                    Ahmedabad
Finalist in the SSIP 2023 Smart Hackathon, where I helped develop a web application for optimizing urban waste management using real-time data analytics. This experience honed my technical skills and demonstrated my ability to deliver impactful solutions under tight deadlines.

❖ **MERN Workshop**   Jul 2023 — Aug 2023
                                                                                    Gandhinagar
Participated in an intensive MERN Stack workshop at LDRP institute of technology& research, gaining hands-on experience and in-depth knowledge of MongoDB, Express.js, React, and Node.js. Led by industry experts, the workshop provided practical insights into full-stack web development, empowering me to tackle real-world challenges with confidence.

MY PROJECT JOURNEY

❖ Chat-App
                                                                                    Based on MERN Stack
❖ Expanse Tracker System
                                                                                    Based on MERN Stack
❖ Mini ReactJS project
                                                                                    Improve my frontend skills
